Top 10 Reasons to Give Blood

10. One of the reasons people don't donate blood is because they were never asked. Consider yourself asked.
9. You can't donate blood to just anyone and you can't receive blood from just anyone-blood groups need to be matched. We need all types.
8. You will get free refreshments after you donate.
7. Nobody can ask you to do any heavy lifting as long as you have a bandage on. You can wear it for as long as you like. It's your badge of honor.
6. It's easy and convenient-it only takes about an hour and you can make a blood donation at a donor center or at one of the many Red Cross mobile blood drives.
5. It's something you can spare. The average person has 10-12 pints of blood in their body-your donation is only one pint.
4. You will be someone's hero. Giving blood means others will live.
3. You will help ensure that blood is there when you or someone close to you may need it. Most people don't think they'll ever need blood, but many do.
2. You may help save up to three lives with just one pint of blood donation.
1. It's the right thing to do.
